

# Asset Management

## Asset Management

The main Asset Management objectives are as follows:

- Managing portfolios with the different discretionary mandates of management received at RIVA Y GARCIA
- Using the different vehicles (SICAVs, Investment funds, Private portfolios)
- Through direct investment in securities (Equities, Fixed income securities, Derivatives, Foreign currencies) or through third-party products (Structured, Investment funds)
- Using long-only strategies and absolute return/alternative investments strategies

The main functions of Asset Management can be summed up in:
